

EXP 3 SERVLET PROGRAM

AIM:

To create an HTML webpage that displays "Hello World" in the center of the page inside a styled box using CSS for alignment and styling.

ALGORITHM:

1. Start
2. Create an HTML document with a `<head>` and `<body>` section.
3. Inside the `<head>` section:
 - Set the title of the page.
 - Add meta tags for character set and viewport settings.
 - Define CSS styles to center the text and style the box.
4. In the `<body>` section:
 - Use a `<div>` element with a class `box` to wrap the text.
 - Inside the `<div>`, add an `<h1>` tag with the text "Hello World" in bold.
5. Use **CSS Flexbox** to center the box both vertically and horizontally.
6. Apply styles to the box, including:
 - Padding
 - Border
 - Border-radius
 - Box-shadow
 - Background color
7. Save the file and open it in a web browser.
8. End.

PROGRAM:

```
<!DOCTYPE html>

<html>

  <head>
    <title>hello world</title>
    <meta charset="UTF-8">

    <meta name="viewport" content="width=device-width, initial-scale=1.0">

    <style>      body {
display: flex;      justify-
content: center;      align-
items: center;      height:
100vh;      margin: 0;
background-color: #f0f0f0;

      }

      .box {      padding:
20px;      background-color:
white;      border: 2px solid
black;      border-radius:
10px;

      box-shadow: 5px 5px 15px rgba(0, 0, 0, 0.2);
text-align: center;

      }
    </style>
  </head>

  <body>

    <div class="box">

      <h1><b>HELLO! THIS IS LOKESH!!!</b></h1>

    </div>

  </body>
```

</html>

OUTPUT:

HELLO! THIS IS LOKESH!!!

RESULT: Thus the servlet program was successfully executed.
